**Your takeaway from the activity:**

I enjoyed visiting places where I had never been to and not heard of either.  
and met different kinds of people embracing cultural diversity and also I  
learnt the importance of education and to embrace and make use of it positively.

**How will this experience enrich you as a person?**

My experience of visiting places which were about 100 years or more old,  
was very wholesome. I was content as I saw such amazing cultural  
heritage and diversity and how people from different cultures, religions  
come together where in recent times people protest against each other in terms  
of religion, traditions etc. But this experience taught me the importance of education,  
to have pride in what we do and follow as well as to stay united.

As a highschool student, I felt so close to my hometown by  
interacting with shop owners or workers who've been working  
in a 100+ years place and felt very grateful to interact  
with them, and to get to know different types of food  
and, people, and work traditions and even felt great travelling  
to corners of Kolkata where I've never been to. The passion of  
the people we interviewed convinced me to follow the a  
career aligned with my
